- Version control

PROJECTS

ENHANCED USER EXPERIENCE IN ONLINE SHOPPING USING AUGMENTED REALITY

- CARTAR is an innovative online shopping platform that leverages augmented reality to enhance the user experience. By integrating AR technology, customers can virtually visualize products in their real-world environment before making a purchase, improving decision-making and satisfaction. This project combines advanced web development and AR tools to create a seamless and interactive shopping experience. EXPLORE IT

EXPLORE THE PRISTINE BEACHES OF RAMNAD

- The project is a user-friendly travel website interface designed to help users explore the beautiful beaches and tourist attractions of Ramanathapuram. The interface provides comprehensive information, stunning visuals, enabling travelers to plan their visits efficiently. Key features include detailed descriptions, user reviews, and recommendations for must-see spots, making it an essential tool for an unforgettable Ramnad adventure. EXPLORE IT
